

# MECHANICAL WORK

***Faster, easier and safer with Bauer Built's readiness mechanical fleet services.***

Since delays cost money, regularly schedule mechanical services help to eliminate expensive downtime. Consequently, our mechanics and maintenance technicians' goals are to make your fleet readiness faster, easier and safer and to turn downtime into uptime. Ultimately, fleets undergoing regular mechanical services may see reduced expenses and increased profit margins.

Our skilled technicians and mechanics are ready to provide detailed inspections and vital repairs focusing on the following critical areas to keep your fleet rolling.

## **SUSPENSION WORK**

This include repair and replacement of tie-rod ends, shocks, leaf springs and u-bolts, pivot bushings and air ride systems to include alignment services.

## **BRAKE WORK**

Includes repair and replacement for brake shoes, slack adjusters, brake chambers, s-cams and bushings and air brake systems.

## **WHEEL END WORK**

Includes repair and replacement of kingpins, wheel seals, wheel bearings and hub caps.

## **COMMERCIAL TRUCK ALIGNMENTS**

A vehicle that is properly aligned will wear evenly across all tires for better engine and fuel performance. It also prevents premature wear on suspension parts, saving time and money on more expensive maintenance interventions. Proper alignment also reduces driver fatigue from fighting the constant correction of the steering assembly and ensures the safety of all motorists sharing the road.

## **REQUIRED INSPECTIONS**

Includes Federal Highway Administration inspections, alignments and Compliance, Safety, Accountability inspections.

## **GENERAL REPAIR WORK**

Includes installation and servicing of mud flap issues, battery problems, windshield wipers and headlamps and light problems.

## **MOBILE REPAIRS**

In many major markets across the Midwest, Bauer Built offers nearby mobile mechanical repairs. When your truck is away from the yard, we'll send our qualified team and mobile units to where the work is needed and provide many of the same services you'd receive in-bay.
